Product Name: **PTFE Conveyer Belt**

Index of Acteflon **PTFE Conveyer Belt**:

Use of the PTFE Conveyer Belt:

## **Acteflon - PTFE Conveyer Belt**

Acteflon use excellent fiberglass as basic weaving material, first weaves to high intensity netlike base cloth, then coated with excellent PTFE resin to make it into all kinds of ptfе mesh conveyer belt with special production process.

Acteflon provide PTFE Conveyer Belt with excellent release, dimensional stability and high anti-tensile strength Operating temperature range, PTFE coated fabrics using a variety of splices and special offer excellent abrasion resistance and excellent resist medicament property resist antistatic applied, a surface that offer good release, permeability for rapid moisture removal and be strong enough to keep up to the demands of a modern day production facility.

Due to the unique nature of PTFE many products or materials that come in to contact with its surface won't permanently stick. This is highly beneficial where sticky foodstuffs or adhesive can otherwise be a problem.

Acteflon produces PTFE Conveyer belt in varying styles; from small packaging types to large textile oven drying belt and are produced using a number of skilled techniques.

Acteflon range of belt can be supplied max thicknesses can reach 1.5mm and max widths can reach 4m depending on style and type. Acteflon have the facilities to offer either spliced, mechanically fastened or prepared joints ready for on-site installation
