

# Acteflon specialists in PTFE

Item: **Acteflon Sheet- PTFE Sheet**

Product Name: **PTFE Sheet**

Index of Acteflon Sheet:

Apparent density: 2.1 ~ 2.3 g/cm<sup>3</sup>

Tensile strength: ≥14.0Mpa

Ultimate elongation:≥150%

Temp: - 180°C ~ + 260°C

Use of the PTFE Sheet:

**Acteflon Sheet-PTFE Sheet**

**PTFE Sheet** exhibits good strength, abrasion resistance and low friction. **Acteflon Sheet** conforms well to irregular surfaces and offers higher elongation than our high modulus skive PTFE. These **Skived PTFE Sheets** are used widely on printing and duplicating machinery. The electrical insulation used under various kinds of frequency, the seal liner of various kinds of corrosives medium, Anti-sticking materials, lubrication material.

Description of the Acteflon Sheet:

**Skived PTFE Sheet** manufactured by molding with PTFE granular resin, corrosion-resistant liner, seal, lining and gasket, scrap, guide rail, dielectric material for different frequency, bridge bearing slide.

**Skived PTFE Sheet** is ideal as a slide surface, for chute liners, other kinds of liners, or for cutting or stamping into **PTFE gasket** and diaphragms, including complex stamped gasket configurations, many pharmaceutical and food processing.

**PTFE Sheet** has a wax-like surface to which anything hardly sticks. **PTFE Boards** has the lowest coefficient of friction of all known solid materials. **PTFE Sheets** has the best electrical properties of all plastic.
